

Established in Singapore with the goal of presenting unique Made in Italy design solutions for luxury residential constructions in the ASEAN region, seamlessly integrating high-quality, design, and environmental sustainability. Our vision is to become a leading provider of premium windows, doors and glass railings, renowned for their sophisticated design and sustainable attributes. We aim to be the go to destination for those seeking Italian excellence in window, doors and glass railings solutions within the ASEAN region.

Italian Craftsmanship

Our systems and products reflect the timeless artistry and precision that are synonymous with Italian craftsmanship. Each product is a testament to the Heritage and Quality that define Italian Design.

Design Excellence

We prioritize design innovation, offering products that blend seamlessly with modern architectural trends. Our designs not only enhance the aesthetic appeal of any space but also provide superior functionality and durability.

Sustainability Focus

Environmental responsibility is ingrained in our products, contributing to a greener and more sustainable future. We are committed to providing solutions that reduce environmental impact while maintaining the highest standards of quality and performance.

Project by: Arch. Pitsou Kedem

Apexfine windows are characterized by big sliding glass walls realized with very slim aluminium profiles. The fixed frames, suitable to support the wing profiles, are invisible because hidden behind lateral and upper jambs while the lower frame is included to avoid any obstruction on the ground.

These features guarantee transparency and a total view towards the external environment. In addition, the thermal insulation is assured to the full. The sliding is obtained by the use of an innovative Ponzio patent system. The sliding system is integrated in the lower frame through couples of stainless steel wheels joined by a pivot.

The wheels, subordinated by an aluminium profile, guarantee high weight capacity and allow to insert even very heavy insulating glass walls made of tempered and low-emissive glasses. Water resistance is assured by a “false” lower frame, built with a retaining tank to gather infiltration waters which is then drained outward.

The glass walls opening can be manual or motorized, while locks can be constituted by a completely automatic electro-mechanic system.

Project by: Arch. Pitsou Kedom

The Apexfine system allows to build single or double windows, pocket and openable corner windows.

Apexfine windows represent an innovative architectural style able to blend perfectly with all interior design; the different technical solutions allow Apexfine windows to be installed in both renovated and new buildings.

Apexfine system is characterized by fixed frames to lean wing profiles that are invisible because hidden behind lateral and upper jambs; on the lower frame, included into the floor, are couples of stainless steel wheels positioned at 20 cm distance and substaisted by an aluminium profile.

A “false” lower frames is built with a retaining tank to gather infiltration waters which is later drained outward.

Ponzio is an Italian company specialized in the production of aluminum window and door systems.

The company's history began in 1941, and since then, Ponzio has distinguished itself for its constant attention to innovation and the search for increasingly advanced solutions, capable of ensuring high performance in terms of safety, thermal and acoustic comfort, design, and functionality, with particular attention to surface finishes, for which it offers a technologically advanced range.

Impeccable performance, exclusive design, and high reliability of its products – facades, windows, doors, and frameless systems – make Ponzio a reference partner capable of fully satisfying the needs of both the designer and the customer.

 **Ponzio**
Aluminium design since 1941

All supported by constant investments in research, technology, innovation, and creativity: to achieve excellent results and maintain positions of leadership in the market.

Ponzio's constant attention to quality, the environment, and safety has led the company to associate with GBC Italia which pursues the development and adaptation of the LEED brand to the Italian reality.

Shaping Modern Architecture with Design Excellence

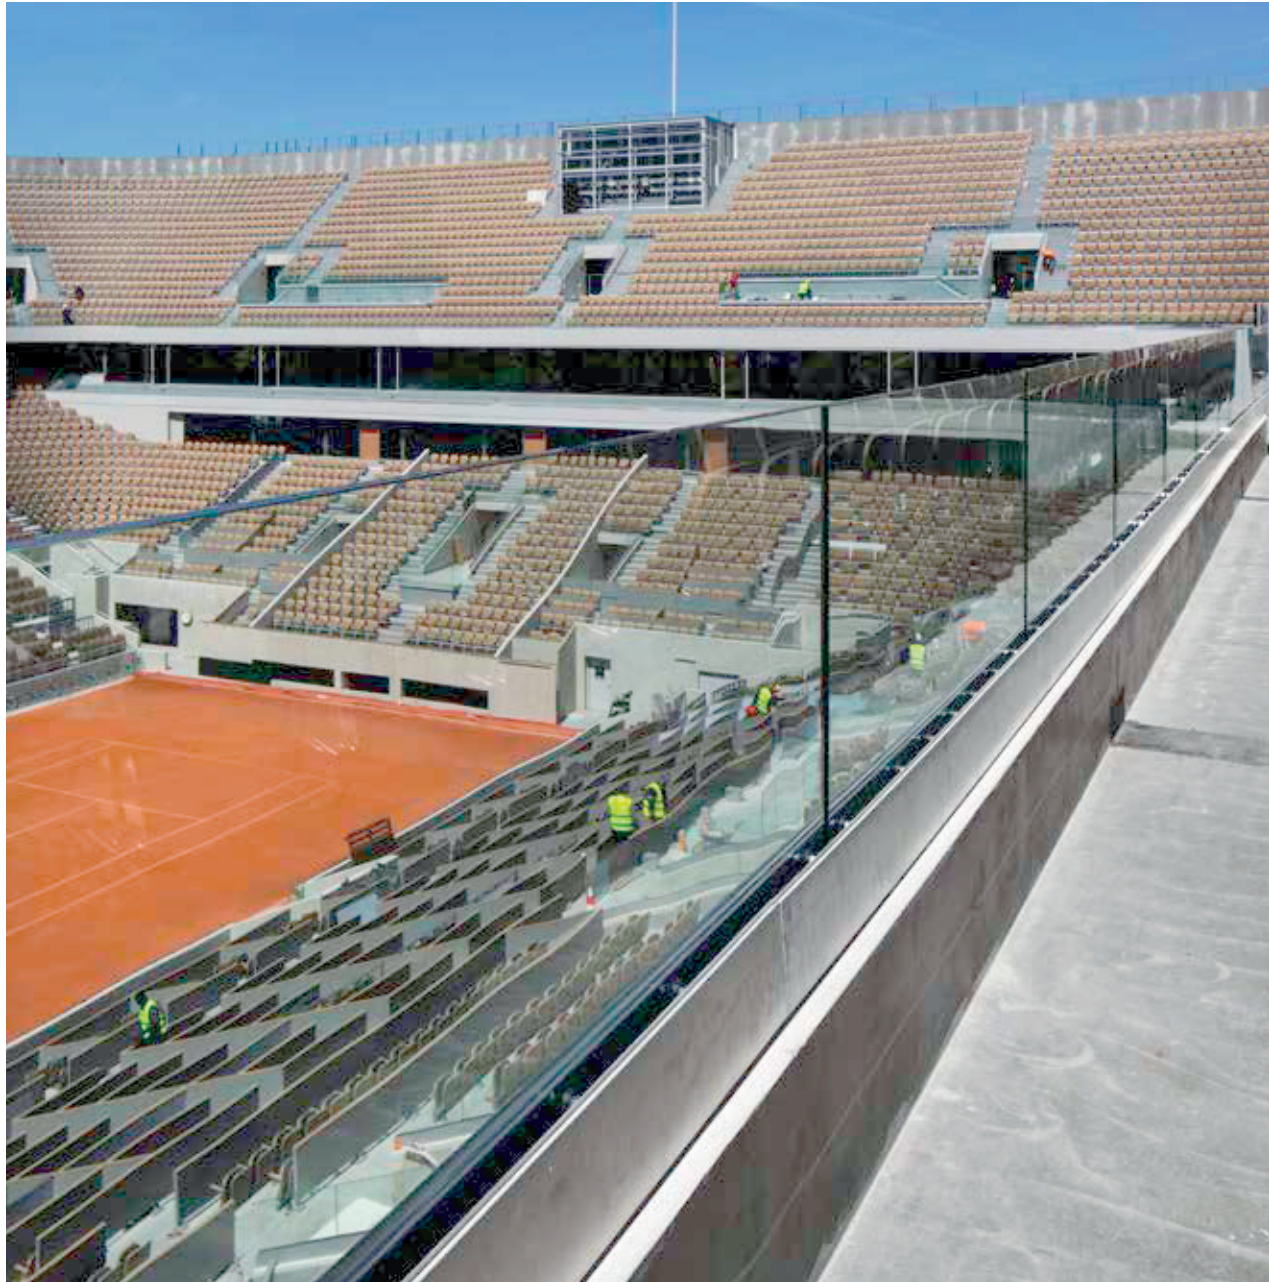

Faraone is a brand that not only creates but also shapes modern architecture, striving towards a future that is increasingly transparent and captivating for all who appreciate design excellence.

With its ability to anticipate and meet market needs, Faraone positions itself as the go-to reference for trendy and secure glass projects.

Notably, in the glass railing sector, the company has installed over 1,100,000 meters since 2009.

As one of the first companies to embrace the innovative technology of point-fixed glass, Faraone grows year after year by swiftly identifying and responding to the trends and needs of contemporary architecture.

This allows the company to focus its product range on cutting-edge design solutions effectively.

faraone[®]

Faraone offers design solutions for balconies, terraces, fences, staircases, interior partitions, and facades.

Each product is a testament to their commitment to design excellence and architectural innovation.

Flessya's strength has always been in the ability to turn people's ideas into reality.

Thanks to an unlimited possibility of customization, our doors, created by skilled and expert hands, make customers' wishes come true.

Styles, materials, versions, colours or finishes, any detail can be selected as you wish.

Each product, in fact, can be customized, to fully communicate the taste and creative ideas of those who have chosen it, without the limits imposed by a rigid range.

Our story begins almost 15 years ago by the meeting between the founding members, already profound connoisseurs of the interior door sector, and a group of wood craftsmen, experts and enthusiasts.

Since the beginning, our advantage has been the ability to operate with extreme flexibility and therefore to respond quickly to the most diverse requests from customers and the market.

Over the years, craftsmanship and custom door designs were enhanced by investments in advanced technologies and industrial equipment.

Today, thanks to the proven production capacity, an efficient network of sales agents and more than 1000 dealers in the area, we are able to satisfy thousands of orders every month, from all over Italy and Europe.

The freedom of choice that we guarantee for our customers is unique. In fact, our range of doors is the largest and most varied on the market.

And when this is not enough, we create customised and completely tailor-made doors, capable of satisfying any stylistic and functional need.

A Legacy of Excellence in Outdoor and Solar Architecture

With over 50 years of history and experience, Chirenti has established itself as a leader in the outdoor and solar architecture sectors. Our pursuit of quality and beauty, combined with fair competitiveness, has driven us to create exceptional products and solutions for our customers. Our half-century legacy is marked by a steadfast commitment to customer satisfaction, the well-being of our human resources, corporate welfare, and environmental respect.

For three generations, our entrepreneurial passion has been guided by human values and meticulous attention to detail. We offer a wide range of systems, models, and versions of removable panoramic windows, including VePa-compliant designs. Each product is optimized to provide the best solution for every need and application in both design and installation.

Our innovative glass systems feature parallel sliding on multi-way upper and lower tracks (grooves), with panels packed laterally to expose only one door. This system is ideal for verandas, porches, and external structures such as pergolas, sunshades, and climatic greenhouses. Additionally, our motorized screen system features vertically sliding doors, where the first fixed lower door acts as a balustrade or, in the TOP model, slides upwards to allow passage.

Chirenti offers a diverse array of outdoor structures and covers to protect and utilize outdoor spaces adjacent to or against buildings year-round.

Our solutions cater to private home gardens and outdoor spaces used for catering, tourism, hospitality, and seasonal adjustment.

We also specialize in innovative building systems and components incorporating G2G or BIPV (Building Integrated Photovoltaic) glass.

This cutting-edge solar collection system can be made in any color and texture, seamlessly blending with the architectural design while being imperceptible, aesthetically pleasing, and of great architectural value.

Discover the Chirenti difference and elevate your outdoor and solar architecture projects with our unparalleled expertise and commitment to excellence.

Excellence in High-Quality PVC Windows

Dimensione Serramenti specializes in the production of high-quality, Italian-made PVC windows.

Renowned for our product and service reliability, we are considered a benchmark in the window and door industry.

Our commitment to excellence and attention to detail are the core values that drive our daily operations.

With decades of experience in creating windows and doors, Dimensione Serramenti stands as an entrepreneurial entity with an extraordinarily established and respected reputation.

Our mission is to develop and present solutions of exceptional quality, designed to meet the diverse needs of thermal insulation and architectural design for homes and buildings.

In line with this commitment, our company focuses on ensuring the complete satisfaction of every specific request from our valued clientele.

The success we have achieved is the result of the synergy between individual talent and the relentless dedication of our team.

Discover Dimensione Serramenti, where Italian craftsmanship meets innovation, delivering unmatched quality and design in every window we create.
